Authority: 1001.41 and 1001.42, F.S.

Policy: 8.32

Date: January 9, 2013

Superintendent's Signature:

Background:

Tobacco use has been identified as the leading cause of disease, chronic disability and premature death in our country. Over-whelming statistical evidence indicates that tobacco use can contribute to heart attack, stroke, high blood pressure, emphysema and several forms of cancer. Non-smokers are also subject to long-term health consequences by breathing the toxins released in passive, side-stream smoke.

Purpose:

The School Board believes that education holds a central role in establishing patterns of behavior related to good health. Thus, in conjunction with an existing curriculum which addresses tobacco-use prevention, the Board established a policy which provides a tobacco-free environment in which students can learn, employees can work, and in which all, including visitors, can be healthy and comfortable.
